Note:

Item Counts include all transactions processed by SLTX during a given time period. This includes all policies, child or non-policy transactions such as endorsements, audits, cancellations, etc., and transactions related to record-keeping. Record-keeping transactions include all reversal transactions (a primary mechanism to resolve incorrect filings) and items which have been reversed.

For example, if a policy is filed with 2 endorsements and an audit, the total Item Count is 4, and the Policy Count is 1.
