

# Introduction

This is a supplemental User Guide intended to describe the following SMART features, replacing Batch Management, Transaction Entry, and Batch Edit Report features within EFS:

## Filing>Data Entry

### Broker Landing page>File>Data Entry

This is a sub section of the SMART User Guide. You may contact TechSupport via [email](#) to obtain a complete version of the User Guide.

Note: Development is in progress; this guide may be updated as new releases are in place.

## Prerequisites

You must have an authorized account with active credentials to SLTX's Electronic Filing System (EFS) or SMART application. SMART utilizes EFS credentials; therefore, separate credentialing is not necessary. Prior to accessing SMART and/or utilizing the API, you are required to accept any licensing agreements: Privacy Policy, Terms of Use, and SMART Connector and/or API User Licensing Agreement (when applicable).

## Environments

The following URLs are used for SMART:

**Test:** <https://test.sltx.org/> **Production:** <https://smart.sltx.org/>

## Site Navigation

To navigate back one or more pages, you may use your browser's back button or clickable breadcrumbs at the top of each page, or the left navigation panel.

## Supported Browsers

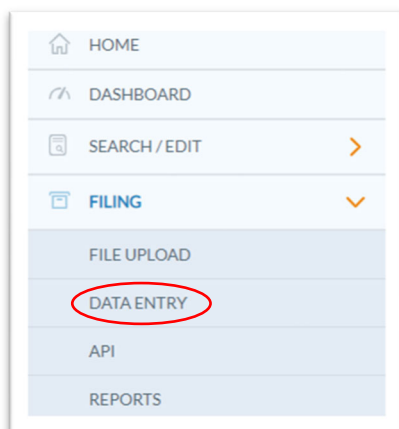

- Google Chrome
- Microsoft's Edge

NOTE: Internet Explorer (IE), regardless of the version, is not supported

## Primary Navigation

**Step 1:** Select Filing menu and click Data Entry.

\*This allows for Manual Web-Entry or Data Entry Filings, and includes ability to Reverse, Update / Correct, or Delete previously filed transactions.

## Data Entry landing page

Once you click Data Entry from the Filing menu, you will see the Data Entry landing page.

### Features

[New Transaction](#) – allows navigation to [Data Entry Transaction page](#) to make filings with SLTX

[Recent filings](#) – allows access to last 20 transactions filed by your agency and includes transactions made by all filing methods (SLTX processed, SMART Data Entry, or SMART API). Click the Policy Number link to view transaction details.

[Save as PDF](#) – allows filing confirmation page to be printed in PDF format

[Go to Search / Edit](#) – allows navigation to Policies Search/Edit page

[Notable changes between SMART Data Entry and EFS Filings](#) – based on feedback provided by users during focus group sessions, several changes have been made to improve overall filing workflow

## Data Entry (Manual Filing)

These steps may be used to create the following transactions: **Cancellation, or Reinstatement**

### Step 1:

Click **New Transaction** from Data Entry landing page to create new filings with SLTX, such as a new or renewal policy / binder, audit, cancellation, premium endorsement, name change, etc.

<**Future Release**> You may also file a reversal, delete, or update (correct) an existing filing.

### Step 2:

Select type of transaction by clicking on corresponding Transaction Type Tile, then click NEXT.

The screenshot shows a web interface for selecting a transaction type. At the top, there is a breadcrumb trail: Home / Filing / Data Entry / Transaction Type. Below this is the title "Data Entry" and a sub-header "Select Transaction Type". In the top right corner, there are four buttons: "Filing" (highlighted in blue), "Update/Corrections", "Reverse", and "Delete". Below the sub-header, a prompt says "Please select a transaction type to file." There are seven transaction type tiles, each with a radio button and a description:

- New Policy**: Policy issued for the first time.
- Renewal**: Policy issued in subsequent policy terms (to extend an already existing policy).
- Audit**: An adjustment of the premium on a policy based on an audit. An audit must be for the entire time the coverage was in effect.
- Cancellation**: Policy is cancelled at the request of the company or the insured.
- Endorsement**: Change(s) to a policy. Used to add or delete coverage from a policy.
- Installment**: Used to let the insured pay out the premium. Usually setup in equal amounts. May be monthly, quarterly, semi-annually, annually, etc.
- Reinstatement**: If there was a Cancellation and premium was returned there would be additional premium for the reinstatement.

At the bottom right of the screen, there are two buttons: "Cancel" and "Next" (highlighted in blue).

### Step 3:

Select sub-type by clicking on corresponding Sub-Type Tile.

<Future Release> Inception Date Change Endorsements; Audit, Cancellation, or Reinstatement Amendments.

Home / Filing / Data Entry / Transaction Type / Transaction Sub-Type

## Data Entry

Transaction Type: Cancellation      Report Date: 02/23/2022

Please select a transaction subtype:

- Cancellation  
Cancellation endorsement.
- Amendment  
Amending an existing cancellation, most often to revise cancellation's premium and MUST have the same effective date.

Find a Policy

Input the policy number and effective date of the Cancellation and then click Search to locate the Policy / Binder.

Policy No.       Effective Date

### Features

“Find a Policy” provides identification of parent policy first (by inputting policy number and effective date of child transaction). This eliminates necessity to search for and/or input the “parent policy ID” and allows coverage code(s) to be automatically applied to your child transaction.

### Step 4:

Input policy number and effective date of your transaction (i.e., cancellation, endorsement, audit, installment) and click SEARCH to locate the Policy/Binder transaction.

Find a Policy

Input the policy number and effective date of the Cancellation and then click Search to locate the Policy / Binder.

Policy No.       Effective Date

<input checked="" type="radio"/>	SLTX-1887	New Policy	SLTX-1887 (F5)	07/16/2020	2	<a href="#">View</a>

### Features

You may click [VIEW](#) to see a listing of policy/binder record displayed, along with any child (or non-policy) transactions already in the system. To view Errors, click [ERRORS](#) column.

## Step 5:

Select appropriate policy / binder, then click NEXT.

### Find a Policy

Input the policy number and effective date of the Endorsement and then click Search to locate the Policy / Binder.

<input type="radio"/>	SLTX-1887	New Policy	SLTX-1887 (F5)	07/16/2020	2	<a href="#">View</a>

## Step 6:

Data, including named insured, policy number, and coverage code(s), are copied from the parent policy into your child / non-policy transaction entry screen.

Input appropriate data from insurance document.

NOTE: To accommodate all cancellation or reinstatement scenarios, SMART allows return (negative), additional (positive), or zero premium cancellations and reinstatements. Therefore, it is necessary to enter a negative sign (-) if cancellation or reinstatement has return premium (or policy fee).

Additional coverage(s) cannot be added via a cancellation or reinstatement.

You may print a confirmation of the filing by clicking [Save as PDF](#). You may continue filing by clicking File Another Type or Continue Filing, or simply click Finish Filing to be returned to the Broker Landing page.

## Recent Filings

### Step 1:

After completing STEP 1 from [Primary Navigation](#), find the Recent Filings section on the [Data Entry Landing page](#). This section allows access to last 20 transactions filed by your agency and will include transactions made by all filing methods (EFS manual or automated submissions, SLTX processed, SMART Data Entry, or SMART API).

To perform an in-depth search or locate a specific transaction, click "Go to Search / Edit".

The screenshot shows the 'Data Entry' interface. At the top, there is a breadcrumb trail: 'Home / Filing / Data Entry'. Below this is the 'Data Entry' title and a 'Get Started' section with the question 'What would you like to do today?'. There are two main action cards: 'New Filing' (blue) and 'Search / Edit' (white). The 'New Filing' card includes a 'New Transaction' button. The 'Search / Edit' card includes a 'Go to Search / Edit' button, which is highlighted with a red arrow. Below these cards is a section titled 'Recent Filings - Last 20 filings', which is also highlighted with a red box. This section contains a table with the following data:

BATCH	POLICY NO.	REFERENCE	TYPE	EFFECTIVE DATE	USER ID	TOTAL GROSS	SAVE AS
5995	<a href="#">TESTCANCELRX</a>		New Policy Reversal	01/18/2021	TESTPOST	\$-1,468.95

Click Policy Number link to view details of a specific transaction.

## Save as PDF

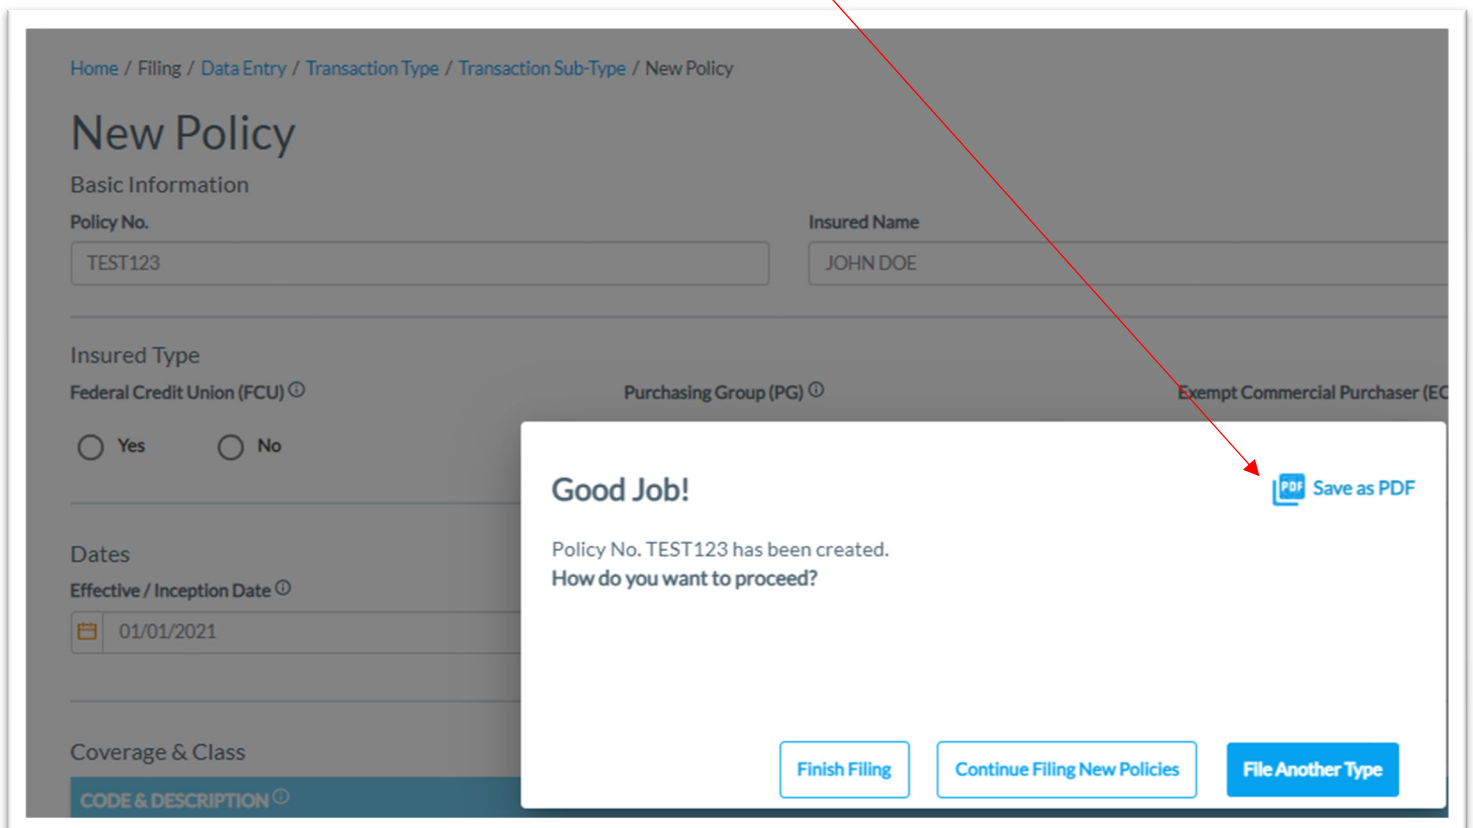

### Step 1:

Click PDF icon from Recent Filings section on [Data Entry Landing page](#) to print a confirmation of individual filings. This confirmation page will include all data elements input on the transaction, including Report Date, Batch Number, and SLTX ID (Policy ID) assigned by SLTX, and will serve as an affirmation of the filing and acceptance by SLTX.

## Notable changes between SMART Data Entry and EFS Filings

1. It is no longer necessary to create a Batch. SMART will automatically add all transactions to your batch. SMART will create new batches as necessary to facilitate filing requirements; however, in almost all cases a single batch will be created for each day your agency reports filings and will contain all Data Entry filings made under your license (regardless of the user creating those filings).
2. It is no longer necessary to manually input (or type) the tax, stamping fee, and/or total gross amounts. SMART will automatically calculate these amounts based on the coverage premium(s) and policy fee that you enter and display the amounts on the entry screen. It is necessary that these amounts are shown on the insurance documentation (per [6 TIC 981.101\(c\)\(3\)](#) and [28 TAC 15.5\(a\)\(3\)](#)). You may use SMART's calculations to assist you in this confirmation.
3. Instead of a Batch Edit Report, users may [print a confirmation](#) of each filing at any time once the posting / filing is complete.
4. With non-Texas exposure, you are only required to enter individual state and corresponding premium. It is no longer necessary to separately enter Breakdown of States Summary premium.
5. For any non-policy or child transaction, you will be prompted to identify the parent policy first (by inputting the policy number and effective date of the child transaction). This eliminates the need to search for and/or input the "parent policy ID".
6. SMART will automatically display corresponding coverage codes (from the original policy filing) for any non-policy or child transactions. It will no longer be necessary to look-up that information prior to filing.
7. Pending transactions will no longer be created for Manual Data Entry transactions. Instead, you will be notified immediately on any errors preventing acceptance of a submission. You will be prompted to correct the errors to complete the transaction.
